---

**From 2025 - 2025**
**(Portugal - Porto)**

### Oddsgate
QA

Performance tests were created using K6 and responsive games with a Godot frontend and a GO, Python, and C# backend. Automated testing was implemented with Playwright and the javascript language (js).
Daily meetings and retrospectives were held with an international team from countries such as Ukraine, Germany, and others. Improvements and documentation of production processes were made, facilitating and enhancing, in a creative, integrative, and playful way, the understanding and visibility of the process steps for everyone with each production release.

**From 2024-2025**
**(Portugal - Remotely)**

### Nextbitt Sustainable Asset Management
QA Engineer

Cross between two teams: web and mobile, testing in device with Vysor in Mobile Android, Xamarin and .NET Mauí, through HTTP Interceptor, in web functional and addition to the Postman API when reaching endpoints. Tests manuals with NFC and RFID. See Application Insights Azure non-productive environment and Firebase Crashlytics. Pause and restructuring of web automation with plawright and C#, methodologies and ceremonies, opening, bug classification and queries pontuals and tests via DB in SQL with SQL Server Management Studio. AI product testing in the structuring and launch phase, invisible and silent work to make the environment more balanced and safe, creating action plans for leadership in the corporation expansion. Meetins in English, Portuguese or Spanish every two weeks with the company's Spanish group.

**From 2023 -2023**
**(São Paulo Brazil Remotely)**

### Tata Consultancy Services
Test Specialist

Making the transformation in favor of software quality, improving and structuring processes in the best insurance company in Brazil. Promoting maintenance in automation in SE and Java, where there was a challenging environment for us to promote the evolution of automation without losing everything that had already been built. Test scenarios integrated with Octane. Constant observation to identify points to be improved, always thinking about agility and quality, promoting better team integration, especially in the relationship between quality and development. Punctuation of business rules amid their complexity together with product owners, QA Chapter and the triad, making deliveries faster and with higher quality. Focusing on minimizing the bug wake. Strengthening the relationship with the customer and usability always in favor of users. Differential: Testing with AI in the auto insurance industry.

**From 2023-2023**
**(São Paulo-Brazil Remotely)**

### BRQ Digital Solutions
Senior Quality Assurance

Planning functional, stress, performance in web and BD, preparing the test pyramid (forecasting tests according to the infrastructure diagram), executing functional and regressive tests, specific tests in Insomnia, database tests via Bastion and the AWS console, recording and monitoring bugs in non- productive processes, documentation and improvement in processes and stories, always aiming to improve the specification of requirements to increase the chances of safer, more qualified and assertive development, facilitating the team in solutions with a higher level of quality and support in unit tests in pair with devs web, for platforms of financial exchanges.

**From 2020-2023**
**(São Paulo-Brazil - Remotely)**

### Zup It Innovation
Sr. QA Automated

Cross-team collaboration such as QA in the insurance functional team in a left shift approach. Consolidated an entire journey of opening Auto and Life Claims. I applied NVDA, Android and IOS Accessibility tests, implemented automation tests with Cypress initial no good practices, and was able to disseminate quality culture in 20 teams.
